Green Carbon Wallet

(Carbon, plastic, biochar credit certification & trading)

Meaningful Tourism Centre

- Meaningful Tourism Centre is a non-profit organisation based in London, with headquarters in Kathmandu and partners and trainers around the world
- Founded by Prof. Dr. Wolfgang Georg Arlt FRGS FRAS – “PROF M”
- Promotes the growth of a Meaningful Tourism Economy globally
- Provides a holistic approach to sustainable tourism and hospitality
- Supports hotels and resorts with working transformation strategies
- Acts as a reliable strategic long-term partner

What is Meaningful Tourism?

The Meaningful Tourism paradigm defines six main stakeholders in tourism and hospitality. All six need to receive objective benefits and subjective satisfaction from tourism and hospitality activities to support the sustainable development of destinations, companies and organisations, to mitigate and adapt to climate change and to successfully perform transformative processes within a fast-changing world.

Meaningful Tourism is a holistic approach to sustainable tourism development, which includes all key stakeholders. It involves aligning benefits and satisfaction, with measurable Key Performance Indicators (KPIs) for continuous improvement.

Carbon Credit Trading is part of the Meaningful Tourism Economy

Carbon Credit Trading within Meaningful Tourism Economy

- Reduce resource consumption
- Measure verified savings
- Generate tradable credits
- Earn revenue
- Strengthen sustainability positioning
- Attract better guests and partners
- Find and retain motivated employees

How the Program Works: A Simple 4-Step Process

1

Assessment & Baseline

We analyze your hotel's current energy, water, and waste usage to establish a precise emissions baseline.

2

Optimisation & Reduction

Implementation of tracking your reduction progress

3

Verification & Credit Generation

Converting your verified reductions into high-value, tradeable carbon and water credits.

4

Trading & Revenue

Finally, selling your credits on the global carbon markets, delivering regular revenue directly to you

Your Triple Win

Lower Costs

Reduce energy, water, and waste costs with data-driven efficiency improvements.

New Revenue

Earn income from verified carbon and water credits generated by your sustainability efforts.

Stronger Brand

Enhance your green image with guests, corporate clients, and employees.

How It Works in Your Hotel

- Assessment & Data Integration
- AI-based real-time monitoring
- Resource optimisation program
- Verified savings & certification
- Carbon & Water Credit generation
- Trading & revenue distribution

Typical Cost Savings

Energy savings: 10% – 25%

Water savings: 15% – 30%

Waste cost reduction: 10% – 20%

Example (80-room hotel):

Annual energy bill: \$200,000

20% savings = \$40,000 annual savings

Up To 30%

Low-Risk Financial Structure

- Performance-based fee models
- Optional investment coverage models
- Reduced upfront risk
- Revenue-sharing aligned with results

Strategic Advantages for Your Hotel

- Stronger SCG/ESG reporting
- Support for sustainability certifications
- Improved investor attractiveness
- Higher guest trust & satisfaction
- Increased staff motivation

Why Partner with Meaningful Tourism Centre?

- Tourism & Hospitality specialised sustainability integration
